

Facilities Smart Sensors

Live Monitoring, Alerting & Displays

MaintainPad

Temperatures, Humidity, Leaks, Movements

Open Integration API's to Existing BMS
Secure and Real-time API's available that connect to all leading CRM's and ERP systems

Alerting the Abnormalities

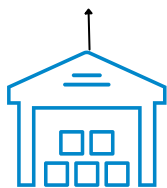

Real-time alerts on text, emails and WhatsApp can be triggered based on defined criteria

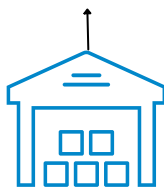

LIVE CENTRAL DASHBOARD

Scalable and Customisable

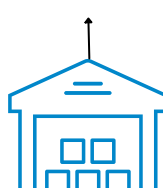

Diverse range of sensors that work together or independently. The system is scalable to increase with demand and can be customised for specific requirements

IFFCO is one of the Middle East's biggest food companies. IFFCO are already using our food sensor technology.

Smart IoT Sensors

Smart sensors monitoring environmental factors such as temperature, humidity, motion, leaks and location in real-time.

Works with existing Building Management Systems (BMS), with our Open API's.

Live monitoring & alerting about abnormalities. Preventing damage.

Smart IoT sensors for monitoring leaks, heating, cooling, movement and more. Recording and notifying abnormalities to staff in real-time.

Temperature: -40°C~85°C
